

There is currently a worldwide pandemic coronavirus infection. Ontario has been affected. This infection is highly contagious and can spread easily to others. Steps must be taken now to contain or mitigate the spread of the disease.

To prevent the spread of the virus, please practice social distancing, avoid large groups, and regularly wash your hands. If you are sick, cough or sneeze into your sleeve or elbow or wear a face mask, if you have one.

Please review the Ontario government's self-assessment tool to see whether you may have coronavirus.
